The following images have been identified as sexually suggestive images by Wikipedia: Any ideas why they might be removed by Wikipedia's robots? If so, why, and is there anything that can be done about it? I find these images in other large Wikipedia pages, not specifically linked to the Notability page and not hidden as in this example. It's similar to the problem in this post about the removal of a Wikipedia user's signature which can be reverted by a User:WolfensteinWolfenstein with his comment "reworded.". A: You can do two things: Contact the robot author, a bot owner is usually listed in the edit history, check there. Check the current version of Wikipedia's robots.txt. There's a small, but useful tool which can generate a new robots.txt for you, simply give it some keywords and you'll receive the generated robots.txt back in a few seconds. Either of these should help you. Q: preg\_match URL parameter in PHP, some extra behavior Hey guys I'm having an issue with some extra behavior in my preg\_match. It is a javascript form that sends a POST to another page. So when I do a get, it contains a POST in it, so i use preg\_match to capture what ever is in the querystring. \$parts = explode('&', \$\_SERVER['QUERY\_STRING']); \$url = ""; foreach (\$parts as \$i => \$part) { \$value = urldecode(trim(\$part)); \$url.= (\$url!="")?'&':""; \$url.= urlencode(\$value); if (strpos(\$url, '=') === false) break; 2d92ce491b
