The new object in scene creation mode in Maya LT 2019 is an icon that looks like this: Here are the four main features of this icon that I have been working with for the past couple of days.

What is it? I can move the object to a new place in my scene with the Ctrl key. I can move the object to a new place in my scene with the Alt key. You can create and edit objects with the new icon in Create mode. I created this character that looks like this and took a screenshot.
