I'm looking for any good use for canned compartments. I can think of using them for assemblies in a setup that needs multiple assemblies, but why would one leave it in the packaging and then place the carton on the shelf? The little compartments are pretty cheap, so I figured there must be a use for them. A: You might try: Using them to organize in your toolbox Using them to organize on your desk and filing them away. A: I use them to store small amounts of ingredients (usually spices) so I can easily find them when cooking recipes. It can also work as storage for cooking equipment and supplies. A: I use them as traps for finding cutlery when I find myself in the kitchen. Q: How to format html that has strikethrough text (Google Code Prettify)? I have used Google Code Prettify to format HTML, PHP, and Javascript in a textarea. My code does not have strikethrough text formatting, and I have been unable to find an example. I have tried to add the following CSS, but without success: .code { background-color: #ffffff; color: #000000; font-family: monospace, monospace; font-size:
