Windows Live Messenger (WLM) 10.2.08.16 is a major release for the IM client developed by Microsoft. Major new features include the new messaging service, a button for Web search, and a new photo viewer. In WLM v10.2.08.16 the Windows Live Search service is integrated in the program's interface, which means you can search your contacts, bookmarks, contacts' files or blogs directly in the WLM client. You can search your contacts through their Windows Live Profile or by using other online addresses: a query for an e-mail address, a Facebook profile or a Web site URL. This enables you to get all the information and content about the people or the contacts, which you can also attach to your chat messages. A new button in WLM is now available: Search. From this button, you can start a search directly from the WLM client. The search box can work with search engines such as Google, Yahoo and Bing. And, of course, you can also filter the search results by dates, and enable the multi-search option. New in WLM v10.2.08.16 - WLM 10.2.08.16 is a major update that incorporates many new features. - The layout of the main dialogs has been changed: - The main WLM dialog has a new layout that's similar to that of Windows Live...
