Patients suffering from a long-term growth hormone (GH) deficiency have good news. American Medical Care, a top medical tourism company, based in the US capital of Washington DC, is now working with some of the top endocrinologists to offer comprehensive solutions at reasonable prices to patients worldwide. So, those planning to have human GH therapy abroad can start arranging for money and preparing for the treatment.

Human growth hormone is produced in the pituitary gland, and plays a vital role in bone growth in children, keeps organs and tissues healthy, and helps people with cellular regeneration. It also promotes protein production, burns fat, and helps keep blood sugar levels under control. The levels of GH may fall due to several health conditions. People suffering from GH deficiency may

experience fatigue, depression, heart disease, decreased muscle strength, hair loss, and insulin resistance.

When asked about how their GH therapy can help patients, one of the officials replied - *“Our GH therapy helps patients increase their muscle mass and reduce visceral fat. The excess fat deposited in the abdomen can increase heart disease, stroke, and cancer risks. We have also observed that patients with low GH levels have high cholesterol levels. So, anyone willing to have [human GH therapy abroad](#) and lead healthy life can contact us without thinking too much.”*

He further added - *“We are very proud of our team of dedicated and talented physicians. They are qualified and have gained huge experience in this field. They first run a comprehensive diagnostic procedure to check what the patients need and then brief the necessary medical treatment plan. We offer fully customized services.”*

About American Medical Care

American Medical Care works with a network of medical facility centers that offer a range of treatment procedures at competitive pricing to patients worldwide. They have established partnerships with leading healthcare systems and facilities so that patients can receive top-quality and safe treatment at the most affordable price.

The officials working here have vast knowledge and inside access to the American healthcare system, which allows them to help their patients get the best discounts on medical and healthcare prices. So, if anyone is looking for top-quality bariatric surgery abroad, they can contact American Medical Care.
