If you didn't get a license key, you need to create a new key. Make sure you have the correct number of values in your license file. Good luck! A: I have an older version of XtiDi, Autocad 2018, and used the steps in the link you posted to find a key. I also had an old version of autocad (2017) and used the steps on that page to find a key for that version. I did not have a license key for any version of autocad. However, I did have a license key for the XtiDi version of autocad I was using. I entered that license key into XtiDi and viola, I was able to use autocad 2018.
