Adobe Director is a total multimedia authoring environment for creating, developing and delivering multimedia presentations, games and e-learning applications using Shockwave Player. In addition to its focus on authoring, Adobe Director also provides the technology and techniques needed to build and publish professional presentations, multimedia applications, games, social networks, and other interactive experiences. Adobe Director is designed for creating 2D and 3D animations, games, videos, and other interactive experiences. With its modern and intuitive user interface, an easy-to-learn scripting language, versatile and powerful programming toolset, the interface manages and manages all the components of an application and forms the center for interplay between script and application. You can create applications in a multilingual environment, using scripting language and can easily integrate web applications with your project. Adobe Director Feature: • Advanced 3D and 2D animation engine • Real-time networking, streaming and animations • Support for multimedia, digital photography, video, audio, Flash, ActionScript and HTML • Image processing tools and filters • Built-in models, textures, and elements • Support for video, audio and Flash content • Advanced video rendering • Built-in 3D objects • Interactive and non-interactive storyboards • Accessible.NET development environment • Full JavaScript support • Rich scripting language • Built-in media and

applications • View-to-view transitions, layers, and effects • Encoding and transcoding capabilities • ByteArray support • Compound data file support • Built-in media filters, bitmap filters • Multi-lingual support • DirectShow and FMOD support • DirectSound support • Media synchronization • Audio, video, image import and export • Encoding and transcoding capabilities

Most likely, when you are creating your project in Adobe Director, you are using a combination of different file formats. It is possible to convert any file format natively to other formats. Although you can directly edit a file without conversion, if you are planning to use the file in another application like Flash or publish your application on the Web, we recommend that you convert the file first. Why should you convert files? The file formats that are used for editing content include different file types. File types are independent of the application you are working in; they include text-based documents and video and audio files. When you add a new
