Africatown Africatown is a term that originated in Florida, United States, but has since been used in the United States and Canada to describe a number of communities of African Americans. The term is generally used to refer to informal settlements that arose during the Great Migration, and possibly as late as the 1960s. African American neighborhoods in the United States generally connote former ghettos. The term may also refer to historic settlements in Florida. Specifically: Florida Africa Town, Osce

### What's New In?

Q: How can I use the strrpos() function to get the part of the string where the needle is in PHP? I am using strrpos() to find the position of the substring from the string. Eg: I have \$substring="lorem". I used strpos(\$string,\$substring) to find the position of \$substring in the string \$string. I get the result 7. I want to know how to get the part of the string where the needle is, so in this case the substrings before and after \$substring. A: You're looking for offset(), and there is no need to pass it a substring. \$substring = 'lorem'; echo substr(\$string, 0, strpos(\$string, \$substring)); A: To find the beginning of the string, use 0 as the parameter Example: It returns probiotic A: To get the position of the last occurrence of a substring, use the function last\_index\_of(). Example: Q: JSP Form Code needs to be in separate file to display in view I have a JSP form in a JSP file. The form works fine when I hard code values into the JSP page source. But if I set the values from the database (instead of hard coded values), the form simply doesn't display. For example, if the form
