The development and evaluation of an automated fetal heart rate interpretation system using a single channel continuous wave ultrasonic fetal heart rate monitor. A web-based automated fetal heart rate (FHR) interpretation system was developed and evaluated using a single channel continuous wave (CW) ultrasonic fetal heart rate (FHR) monitor. The fetal scalp blood velocity waveform was digitized and used for the interpretation of the FHR. The fetal heart and uterine muscles were modeled as separate compartments within the abdominal and the maternal chests. In addition, a software algorithm was developed that allowed the fetal heart rate (FHR) to be interpreted in a clinically significant manner. The software was developed using a set of electrocardiogram (ECG) features taken from FHR waveform segments that are commonly utilized for the automated interpretation of FHR by a human observer. These features are: variations in the accelerations in the R-wave (R-component), the QRS complex (QRS component) and the T-wave (T-component) of the ECG. For each feature the sensitivity, specificity and the likelihood ratios (LR) for false negatives (FN) and false positives (FP) were calculated. The performance was evaluated using an ECG-based reference standard. The ECG and FHR features for the T-component, QRS-component and R-component, showed consistently good performance in terms of sensitivity, specificity and likelihood ratios. The T-component feature was most successful at correctly classifying a FHR into the following categories: FHR category (Nebulization) 100 BPM. Features related to the R-component were the most sensitive, but showed FP results. When the FHR of more than three beat segments was displayed, no ECG features were capable of delivering a FP result. For the features based on the T-component, the lowest false negative results were obtained with the feature that generated FN results when the FHR was

The Smudge Brush allows you to use delicate strokes to create an abstract look. This may not be the first tool you think of when it comes to creating art, but there are many artistic ways to use the Smudge Brush. Image Correction Brush : The Pen Tool, or the Photoshop Brush tool, allows you to easily paint or trace shapes. The most common way to use the Brush is to trace or paint a shape like a car, or a hand on a front window. You can use the Brush with the Pen Tool or the Pencil Tool. The Pencil Tool allows you to draw in a digital camera image using only the outline of your fingers. It is very naturalistic, and can yield a beautiful sketch. You can also use this tool for erasing digital photographs, for example. Magic Eraser : The Magic Eraser is used to remove pixels from an image. It does this by "erasing" the pixels to the point where they can't be recovered, such as for removing freckles. The Eraser Tool is used to remove unwanted parts from an image. It can remove lines, curves or even background objects. It does not work very well on specific areas of an image. The Eraser Tool is a destructive tool, which means that it will destroy the pixels where it is used. This makes it useful for removing freckles, stains, and any defect in a picture. Variance Brush : The Variance Brush is used for creating abstract images. It is fairly responsive, and many people use this brush for blur effects. The Variance Brush can be used in many ways, like the Gradient Tool, or it can be used in ways that require subtlety. The Blur Tool is used for blurring images. You can blur an image either with a circular or rectangular blur, or by increasing the blur amount. You can also blur a selected portion of an image, or a single pixel. The Shader is used for creating a glow effect. It may have a radial or spot light effect. You can also use it to "painter" a gradient effect, or to create a change of tone from one color to another. The Gradient Editor allows you to create a color gradient or create a specific gradient. You can edit any color of the gradient on a continuous base. You can modify the angle of the gradient, modify the length, and choose colors. Bulge
