If you're an online business owner and your website is powered with WordPress, then you need to take regular backups of your website. Yes, you read it right! You don't have to be technical to take website backups! You can easily set up WordPress backups to your computer, hard drive or cloud drive. Let's take a tour of the most important features in Photoshop. Contents: 9 Powerful Photoshop Tricks I Use Every Day 30 Photoshop Tricks for Advanced Photographers 1. How to Use Photoshop's Layer Mask to Mask Everything We often mask an area in Photoshop to cover up something we don't want to show. Let's take a closer look at this. Let's say, we have a photo that includes a few background trees. In order to change the way the trees look, we can use a layer mask. In the Photoshop workspace, we apply a layer mask with the brush tool. In this case, we have a forest-like background that appears to be planted on a yellow background (we're painting). Our photo includes some trees, a couple of buildings and a few people. By painting over the brown trees, we can add some green to the rest of the image. We'll reveal this layer mask to see the overall effect. Here's the result: A beautiful photo with an area masked off. To learn more about how layer masks work, check out our detailed Photoshop tutorial! 2. How to Import an Image Faster Using a Bridge Device Bridge allows you to view, organize, edit, collaborate and share photos and other files online. You can easily share your favorite photos with friends, family and the world. Bridge is available as a web app, or you can download a standalone Windows app. You can manage files you've already uploaded to your account, as well as documents and folders that haven't uploaded yet. You can view your photos and other files online with a beautiful user interface. You can also sort, resize, rotate, crop, edit and enhance the color using Bridge. You can import photos into Photoshop using Bridge. To import photos, go to Files > Open > Browse Files. Once the photos open in Bridge, you can click on them to import them into Photoshop. 05a79cecff

Learn how to use the History panel (Appendix B). * View the Options dialog box (Window → Options) and check the boxes for the items you most frequently use and then click OK. * Locate the buttons or icons you use most often by placing the cursor over the little blue icons (that appears in the bottom-left of the tool window) and pressing the F key, or you can press and hold the Ctrl key and click on an icon. * When you make a selection by clicking on an area of the image, the tool used to make the selection can be seen in the tool window. Drawing** In this chapter, you will learn: * How to draw with the Pen tool * How to draw curves, and even how to draw things like lightning or arrows

Leaning Variational Inference - gwenz ===== gwenz Original paper [----- matryoshka Does this work in principle also for stochastic gradients? If so, can we observe the same convergence to MAP solution as we do for gradient-based methods? ~~~ gwenz I think the MAP solution is overkill for this problem. I believe we are most likely solving $\min f_t(x) + c \Rightarrow e_t$ ~~~ matryoshka My point of view is if we end up solving a tractable problem, we are only stopping at one point for sure. For that reason, we may see the same convergence, but that convergence is not to the minimum of the problem in the sense of infimum. ----- solipsism Anyone here tried this for inference over uncountable families of densities (like Gaussians)? ~~~ gwenz No, though I've seen it used for this in previous work. I think a possible use case would be: a finite mixture of Gaussians. And the paper makes clear that this can converge to a MAP solution. ~~~ solipsism That's actually very clever. What kind of convergence are we talking about? Closeness in terms of KL divergence? ----- mfrun Does this work with densities, as in $\mathbb{P}(x)dx$? ----- saturn_dev Is it possible to define a function $f(x)$ which on its own minimizes KL divergence to another random variable X ? ----- bradlys Does this mean if I give you 1 trillion options to choose from, you would choose "any" one of them? :) John "Snuggles" Thompson, the world's foremost animal hat person, will be coming to Orlando! On Oct. 1st, Snuggles and DoDo Productions, a local dog fashion company (seriously), will be hosting a meet-and-greet at the
