Use our features to create additional problems, differentiate between difficulty levels, and view detailed step-by-step instructions. - Dynamic, intuitive interface - Advanced features with an easy user-interface - Fully searchable and customizable in-text, in-line help - Interactive quizzes - Screenshots - More than 1,000 additional lessons, tutorials, and activities to enrich your curriculum - All content is completely free to use. No registration required. 6ZIP Commander is a friendly, easy to use file archiver and 7-zip compatible file decompressor. The bundled CD-Key Generator is used to generate a new value, that can be used to activate your copy of the free version of 6-Zip Commander. You can generate an unlimited number of codes. Once the license is validated, the program automatically installs itself and provides you a command line interface. The interface is easy and simple to understand, if you want to extract, archive or compress a single file or multiple files. New in version 1.7.3: When you extract or compress files from the archive window, a preview will be displayed before extraction or compression (if available). You can now choose the format for the extracted content: Windows (FAT), Linux (FAT, NTFS) or Mac (HFS). You can now choose whether to use the free space left on the destination (extract) or leave it untouched (compress). Added a progress bar to the progress window to make it easier to monitor the overall progress. Added a check to ensure that the selected file(s) are not read-only. Added a command line option to exit the program without saving the content. Added a switch to create a 32-bit executable file (if the previous executable file was a 64-bit file). Added a switch to create a 32-bit self-extracting archive. Bug fixes Fixed

One of the most exciting and productive memories of my life was learning Advanced Mathematics from my friends and from teachers at Jadavpur University. So, I present the 9th Edition of Advanced Mathematics provided by VIXIL. More advanced problems of the first three chapters are on the website and it is truly impressive. I am sure that these problems would enrich your mathematical skills. I hope that it would be enjoyed as much as I enjoyed at JU. Trigonometry: Tables of Triangles, Congruences, Areas, Angles, Circles, Quadrilaterals, Parallels, Horizontal and Vertical Lines, Rectangular and Circular Fractions and C.P.F. Formulas. Lessons and Exercises in Number Theory: Rational numbers, Factoring Irrational numbers, Quadratic Forms, Rational Root Theorem and Quadratic Reciprocity Law, Prime and Unit Factors, Square and Multiple Factorization, Rational Roots and Nested Radical Expressions, Rational Roots and Polynomial Evaluation. Calculus: Derivatives and Integration by Part and by Least-squares methods, Definite integrals, Integral tests and contour integration, Complex Variables, Singularities in complex functions, Analytical methods for complex functions, Applications of the different methods and power series. Algebra: Algebraic expressions, Terms and Exponents, Associative law, Simplifying expressions, Pythagorean theorem, Quadratic and Completing the square, Simplifying radicals, Properties of Algebraic expressions, Factorizing polynomial equations, Quadratic equations, Permutable Polynomials. Geometry: Parametric Geometry, Axioms of Geometry, Geometry on a plane, Different types of lines, Generalized coordinates and Coordinate geometry, Conic Sections, Functions of parameters and simultaneous equations, Trigonometry, Equations of plane curves and sphere, Real and Complex numbers. History: History of Geometry, History of Trigonometry, History of Calculus. Harmonic Function: Properties of harmonic functions, Harmonic conjugates and function and value derivatives, Rescaling and conformal mapping, Taylor Series and Symbolic Replacements, Fourier Series, Euler's Polynomials

and Variation of Arcs, Eigenvalues and Eigenvectors, Laplace's Equation, Cauchy-Euler Equation,

MathPractice is a unique concept in which a teacher provides a math lesson by means of a math game. You can also create your own math games and play them to practice your math skills in advance. There are 10 levels in this program and each level includes 3 independent experiments, of which the user can choose only one to take. MathPractice can be helpful for students who are in a maths group but are not particularly good in maths. MathPractice provides short quizzes to monitor your progress along the way. There are no lesson plans or handouts for you to refer to. MathPractice will help you to learn maths, improve your memory and to sharpen your skills in math. MathPractice also includes a great Math Practice Tool to facilitate your learning. Features of Math Practice:

- MathPractice is a fully developed standalone product.
- Lesson plans are not necessary.
- MathPractice is easy to use, without any complex installations.
- MathPractice is compatible with Windows XP/Vista/Windows 7/8/8.1/10.
- Language settings have been setup to help you.
- MathPractice is a comfortable, easy and fun way to learn maths.
- You are also able to create your own maths game and practice with it.

Math Practice is suitable for both schools and homes. It is an easy-to-use tool for everyone. MathPractice is not the full-fledged teacher, it is the tool to get you started learning. MathPractice is easy to use, the game is intuitive and interactive. MathPractice is also a great Math Practice tool to facilitate your learning.
