But i am unable to understand the method, which I wrote in my code and I need to save it in the text file in.sql format. A: Yes you can create a.sql file and add your table and column names to it. And there is a.sql extension used for such purposes. Just specify the path of your table, and it will create the.sql file with the name as your table name. Use the below code for creating the.sql file. You should append the.sql extension for the file name. import sqlite3 with open('C:/Users/User/Desktop/user.db', 'a') as file: file.write("CREATE TABLE IF NOT EXISTS Market (Id int,Product nvarchar(30),Date nvarchar(30),Time nvarchar(30),Unit nvarchar(30),SubCategory nvarchar(30),Code nvarchar(30), PRIMARY KEY (Id), UNIQUE (Code)) ") This is just a sample code, but you can tailor it for your needs. Hope this helps! 5 In Your 30s: How to Decorate Your Bathroom July 12, 2019 Renovating your bathroom is one of the best ways to extend your bathroom decor to a place that's more modern and gives a whole new look to your bathroom, and even give you the opportunity to add a cool vibe to the space. Your bathroom can be the perfect place for storing many things, from your toothbrush to the shoes you used yesterday. However, we have some tips to help you decorate your bathroom for the most stylish look that you can achieve. Here's what you can do to turn your bathroom into the perfect home for you and your family. Make Sure You Have a Linen Storage Linen is a good way to utilize your bathroom space and add a fresh feel to your bathroom. Linens have different shapes, sizes, and even colors, which means you can have it all. You don't have to worry about having a lot of space in your linen closet, because you can have it in the bathroom. Another thing about having linen is that you can use it as a storage space.
