Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Roblox was ranked #1 in the "Top 100 Teenager Online Game Markets" by eMarketer, and the COVID-19 pandemic has pushed them to the No. 1 position within the US and Canada. Roblox is the only game based platform to claim that title. In February 2020, Forbes ranked Roblox as the No. 1 Global Gaming Company, having generated \$2.5 billion in revenue in 2019.

Roblox Overview: Roblox was founded by Eric Cassel and David Baszucki in 2004. They began working on the gameplay and mechanics of their game using three Visual Basic 6.0 players in their college living room, and the gameplay was largely non-violent. They created a cartoonish world and handled other basics. The game was meant to help them relax and unwind at the end of the day. The team soon realized that there was enough demand for the game to sustain a team. They quit their jobs to start a full-time venture of building a technology company and continue working on their game. They were fortunate to secure funding from venture capital firm KPCB in 2008. In 2009, Roblox began marketing their game to 3D game developers who were looking to make content for WebGL games. At the same time they were still working on their game, which they ported to the Roblox API and released in June 2009. Two years after launch, Roblox had a game development team of just ten people. Throughout 2010

Roblox is a virtual world, where users create their own games, or content. Games can be created using Roblox Studio, a tool used to quickly build a game. Players then play these games in their web browser, using the player-controlled character (PCV). Roblox games are meant to be played alone, with others not playing unless the game creator specifically decides to host multiplayer matches. After first releasing back in 2006, Roblox was used primarily for educational purposes, but in early 2010, the game saw a rapid increase in popularity. With the platform hosting over 164 million monthly active users as of August 2020, it has become the largest gaming platform of all time, as well as one of the most popular applications, in its category. From the company's very beginning, Roblox has been criticised for its addictive nature and exploitative practices directed toward children. Roblox was officially launched on Roblox.com and its first product, Roblox Studio, was released on July 23, 2004. Roblox's current iteration of Roblox Studio, released in 2010, allows users to create games for use with the Web interface, or on the Roblox console. Roblox is free to play, with in-game purchases available through the use of a virtual currency called Robux. While users can create the games themselves, the platform also offers a "game high school" for students to build fun gameplay using pre-approved premade objects, characters, and settings. Beginning January 1, 2020, Roblox games can be built on Roblox Studio, as well. Many of Roblox's games are based on licensed or trademarked characters. Lambert Architecture designed its first building in 2006 for the church of St. John the Divine in New York, and the first edition of the Architectural Designs Collection, released in 2009, introduced the theme of churches in its "Get Inspired" section. The designs, which are intended to evoke ethereal scenes of churches, are illustrated with symbols like depictions of angels and stained-glass windows, and feature an icon used by churches throughout the world. They are complimented with description, from the spiritual to the practical, to encourage others to build their own churches. These designs are listed as "Best of List," voted by users based on the "Designs you love the most." Revolut, formerly known as the British Company, works as an app-based global money transfer and payments platform 804945ef61
